

■ UMETA Grease Gun, foot operated grease pump

for heavy duty, industrial strength that allows for hands-free and waste-free operation, mainly in the outdoor area.

The unique two stage pump creates a wave action that smooths out those annoying airlocks.

Grease will be supplied up to the end of the canister, no follower plate is necessary.

Therefore you will be independent from special bucket sizes, dirty and messed followerplates are history!

special coupler
for hands-free operating

Ref. No.:

1/8" BSP 9626836

M 10 x 1 9626837

- Portable with comfortable carry handle
- Foot operated treadle with pressure release!
When lifting the treadle, the pressure return valve is activated and grease flows back into the canister
- Two Stage Pump with pressure return valve returns grease under pressure into the bucket. Easy and undangerous disconnection of coupler and hose - recovers from airlocks
- Fitted with high pressure hose, min. burst pressure 1,600 bar (23,200 PSI) special coupler for hands-free and mess-free greasing
- The big sized bucket (8 KG, 282 oz) is suited for many greasing points - no change of cartridges necessary
- All steel parts are powder coated for longlife operation, even outside

Technical Details at a glance:

output	3 ccm/stroke
operating pressure	up to 690 bar
filling capacity	8 KG (282 oz.) bulk grease
flexible hose with standard fittings	length 2m (6.5ft) with special G-Coupler hose parking
	high pressure up to 1,600 bar
all steel parts	powdercoated
packed in	single carton box

Scope of delivery	Ref. No.:
with 2m hose and special coupler	9626835
