

■ UMETA Special Coupler XL for grease guns and grease pumps

Extra length to reach difficult lubrication points!

XL size with 137 mm

for heavy duty, high-pressure grease maintenance application

- allows for hands-free and waste-free operation

- works with all grease gun types: pneumatic, manual and electric (battery).
- works on hydraulic-type grease nipples (DIN) and SAE specification Zerk.
- available in 1/8 inch BSP and M10x1 thread, 1/8 NPT on request.
- four hardened spring steel jaws are resilient under high pressure.
- durable nitrile rubber seal for longevity under high pressure.
- check valve to reduce leakage.
- simply depress trigger to release, even under pressure.
- no need to hold while greasing. Lock-on and free up both hands to operate your grease gun. The extra length makes it easier to grease even hard-to-reach areas.

	Ref. No.:
Thread 1/8 " BSP	9626901
Thread M 10 x 1	9626911
Repair kit (containing guide pin and 4 jaws in poly bag)	9626840

Activate Trigger to engage – Easy coupling

A special developed lever action and sliding sleeve securely locks the G Coupler onto the Zerk, creating a leak proof seal. Grease is delivered into the joint. Hands-free greasing comes true.

Activate Trigger to disengage – Easy release

Simply pressing the trigger releases the grease coupler from the Zerk, No more stuck couplers!
