

## ■ UMETA Bayonet Grease Nipples

### APPLICATION AREA

An especially strong and reliable connection with the grease nipple will be achieved by using the bayonet coupler. The construction design also results in a specific high flow-rate of grease.

Particularly suitable for the **Heavy Industry, for example Ship Building.**

### VERSIONS

In general, our bayonet nipples are made of steel, zinc-plated and passivated, and they are featured with a tapered thread.

We offer various standard types also in brass or stainless steel 1.4305 ~ ASTM 303 (V2A).

Upon request, UMETA manufactures bayonet grease nipples in other versions, with respect to the following:

- dimension
- material
- thread size
- thread form (e. g. with cylindrical thread)
- opening pressure
- etc.

### OPERATING INSTRUCTIONS

As suitable lubricating nozzle, we recommend our bayonet coupler.

## Type B1

## Bayonet Grease Nipples

- head Ø 9.9 mm
- straight version A/180°
- standard version made of steel, zinc-plated and passivated, with tapered thread
- for other types and materials, please see table, or upon request
