GREASE GUNS

UMETA grease guns stand for highest quality and reliability.

We are certain of the quality of UMETA products and have a guaranty of four years for all UMETA TWIN-LOCK® grease guns with respect to function. Accurate manufacturing, high quality materials and intelligent product features turn our guns into effective precision tools that effortlessly reach high lubricating pressures.

UMETA TWIN-LOCK® grease guns will be delivered with a user's manual, either in a polybag, or in a coloured cardboard box.

All UMETA TWIN-LOCK® grease guns for 400g (14.0 oz.) grease cartridges comply with DIN 1283 as regards physical dimensions and performance and are suitable for grease cartridges according to DIN 1284.

Our grease guns 75/PK und 75/PL are DLG-certified

Of course, our quality management is ISO 9001-2008-certified

UMETA GREASE GUNS – ADVANTAGES AT A GLANCE

- UMETA TWIN-LOCK® system
- rolled coarse thread for high stability and easy disassembly
- special pressure stability by cast aluminium head and thick-walled barrel
- easy insertion of the plunger into the cartridge by a bulge in the barrel
- inner cartridge stopper
- stable hand lever with security handle
- ergonomic T-grip with jam protection
- knurled barrel for better hold and grip
- separate air release valve or filler valve
- special constructions available
- colours and imprints as per customer's request
- individual packaging
- high wearing security
- even after 30,000 strokes no wear is detectable
- available according to DIN 1283
- wide range of accessories

■ UMETA TWIN-LOCK®-SYSTEM – THE LIFE INSURANCE FOR YOUR MACHINES AND EQUIPMENT

When maintaining your high quality machines and equipment, you should absolutely avoid quasi-lubrication!

What does quasi-lubrication mean?

Upon continuous operation, abrasion can easily take place between the metal piston and the metal cylinder of the grease gun. For this reason, the grease at the top of the piston can be pressed back into the cartridge at a low operating pressure without being noticed. In spite of all efforts, no grease will be transported to the lubrication spot. In order not to expose your machines to this risk, we developed the UMETA TWIN-LOCK® system. In connection with two special sealing elements, it protects the precision piston from wear upon continuous operation. By the special arrangement of the sealing elements, the UMETA TWIN-LOCK® system avoids quasi-

lubrication and grease escaping the piston. The sealing elements are designed in a way that they adjust themselves to the corresponding operating pressure with respect to their sealing effect. For this unique advantage UMETA grease guns are worldwide renowned.

■ UMETA EVER-FLOW SYSTEM

The EVER-FLOW system invented by UMETA ensures perfect functioning of the UMETA TWIN-LOCK® gun, even with thick grease and at the lowest temperatures. This is ensured by an outlet valve equipped with a special ball stopper. Even semifluid biological grease will easily be transported by the vacuum developing during the pumping process. This is another advantage of UMETA's, where many other competitors' products fail.

■ UMETA GREASE GUN KITS

The well-established UMETA accessories for grease guns offer you the optimal solution for any application. We assembled the most common grease gun kits, which consist of the UMETA grease gun of your choice and the following standard accessory parts.

► Our most common standard kits:

Basically, you can equip any grease gun with the accessory parts of your choice. You will find our complete accessories list in our chapter "UMETA Accessories for Grease Guns".

One-Hand Grease Gun with high quality zinc-plated steel barrel

- for 400 g (14.0 oz.) grease cartridges or 500 ccm (16.0 oz.) bulk grease
- with UMETA TWIN-LOCK® system and EVER-FLOW system
- standard air release valve, alternatively with filler valve according to DIN 1283

This UMETA TWIN-LOCK® One-hand grease gun offers you many possibilities. The one-hand operation allows for lubricating even hard to reach spots. Our proven powerswitch system provides the opportunity to adjust the grease supply from high volume to high pressure. Just press the button on the handle, and you will obtain optimal performance.

PUSH-TYPE AND SCREW-TYPE GREASE GUNS

The UMETA programme offers the optimal solution for all lubricating needs. Either with shock-resistant polyamide bodies, or made of high quality zinc-plated steel, with or without telescopic tube: you will find the right push-type grease guns for all sizes and requirements.

Push-type grease guns stand out for their handiness and easy operability. Light pressure suffices to allow for the effective lubrication of hydraulic nipples, ball-type and flush-type nipples. The UMETA telescopic push-type grease guns are equipped with a telescopic tube and are therefore suitable for harder to reach applications.

With our nozzles, you will find the optimal connection to any lubricating nipple according to DIN. UMETA push-type grease guns are equipped with special nozzles M 9 x 1. Just choose the desired push-type grease gun with the suitable nozzle for your lubricating nipple type from the list!

OIL GUNS

UMETA oil guns are specially designed for operation with oils and high-viscosity grease, and they are manufactured with the same high quality as the well-established UMETA grease guns. Sealing elements and accessory parts specially designed for this purpose allow for optimal leakproof oil fittings.
